IPS Active Dynamic 30 (Pension) Quarterly Report As of 30/06/2020

June Quarter 2020

Equity markets have rebounded strongly from their lows at the end of March 2020 as the global economy has emerged from lockdown and major economies have made progress in managing COVID-19. Markets were slightly more subdued in June than in April and May as easing restrictions sparked new outbreaks in the Americas, Middle East, India and, at the end of the month, in Melbourne.

Throughout the quarter, mining stocks, the IT sector and consumer staples have led a recovery in the ASX 200 (the top 200 stocks on the Australian Stock Exchange). Supermarkets, internet-based companies and providers of essential goods have benefited from increased traffic during the lockdown while mining stocks have rebounded in large part because disruptions to the Brazilian supply chain have raised the price level of iron ore and other bulk commodities.

Technology giants like Amazon and Google have also led the rebound in international shares as more people were compelled to work, shop and do business online.

Over the year to June 30, the portfolio (assuming all distributions were reinvested) delivered a return of -0.19%, lagging the benchmark by 29 basis points (0.29%) and placing the fund in the second quartile relative to peers.

The fund slightly underperformed the benchmark because it went into the crisis positioned with a more defensive allocation designed to protect capital in a downturn but managers did not fully capture the upside from the subsequent rebound. We nevertheless took advantage of steep falls in equity markets at the end of March by reducing our allocation to fixed income to 62.5% of the portfolio and investing an additional 2.5% into Stewart Investors Worldwide Sustainability Fund and RARE Emerging Markets Infrastructure Fund in early April. Both funds participated in the rebound and, although Stewart Investors has underperformed on a 1 and 3 month basis, both funds strongly outperformed their benchmark over the financial year to 30 June 2020.

In early July, we also shifted our allocation within the CLAL Fixed Interest Fund from Aberdeen to PIMCO. PIMCO is one of the world's premier fixed-income investors and the Australian Bond Fund strongly outperformed the benchmark over the second quarter of 2020. We believe the new fixed-income fund is well positioned to protect capital and generate excess returns for clients over the medium to long term.

IPS Active Dynamic 30 (Pension)

As of 30/06/2020

Portfolio objective

The WealthFoundations IPS Active Dynamic 30 model is a portfolio of actively managed assets designed to achieve stable returns over the short to medium-term.

Performance[^]

	Since inception (%p.a)**	3 years (%p.a)	2 years (%p.a)	1 year (%p.a)	6 months (%)	3 months (%)	1 month (%)
Total Return	3.9	2.8	2.6	-0.2	-2.0	3.7	0.3
Volatility	3.9	4.7	5.7	7.8	3.3		

**Inception Date: 23/09/2014

Growth of \$100 invested at inception [^]

Time Period: 24/09/2014 to 30/06/2020

[^] Performance data is **after** applicable fees and taxes, and assumes the reinvestment of distributions. Past performance is not indicative of future performance. Due to the flexibility of rebalancing and variations between accounts, performance shown is indicative only and, for example, assumes that there are no deposits, withdrawals nor exceptions to regular rebalancing in the model portfolio.

Return and risk vs. peer group

Time Period: 1/07/2017 to 30/06/2020

Peer Group (1-100%): Insurance and Pension Funds - Australia - Pension - Multisector Balanced

What is a risk and return chart?

The chart to the left shows the returns and associated risk of the model portfolio (darker shape) against its peers (light grey circles), over the past 3 years.

The past 3 years' return (as a percentage) is shown on the vertical axis.

The risk (as measured by the standard deviation) of the investment over the past 3 years is shown on the horizontal axis.
